

August, 2017

Rebecca A. Montgomery
Associate Professor
Department of Forest Resources
College of Food, Agricultural and Natural Resource Sciences
University of Minnesota
1530 Cleveland Avenue North, 314 Green Hall
St. Paul, MN 55108
Ph 612-624-7249 (ph), Fax 612-625-5212 (fax)
Email: rebeccam@umn.edu

Research and teaching interests

Plant ecophysiology and forest ecology focusing on mechanisms of plant response to global change, the role of resource heterogeneity in forest regeneration and dynamics and the role of biotic interactions in plant community dynamics and ecosystem function. Research spans temperate and tropical forests, managed and unmanaged ecosystems.

Education

Ph.D. 1999. University of Connecticut. Ecology. Dissertation title: Seedling performance in heterogeneous light environments: A multi-scale approach
A.B. 1994. Occidental College. Biology, Magna Cum Laude

Professional Experience

Associate Professor, Forest Resources, University of Minnesota, August 31, 2011-present. 50% teaching, 50% research appointment. *Responsibilities:* Undergraduate and graduate teaching, research and outreach in the area of forest ecology and tree ecophysiology.
Assistant Professor, Forest Resources, University of Minnesota, July 1, 2004-August 30, 2011. 50% teaching, 50% research appointment. *Responsibilities:* Undergraduate and graduate teaching, research and outreach in the area of forest ecology and tree ecophysiology.
Research Associate, Forest Resources, University of Minnesota, March 2003-June 2004. *Responsibilities:* Research in the area of forest ecology and tree ecophysiology.
Instructor, Forest Resources, University of Minnesota, January 2003- May 2004
Responsibilities: Undergraduate and graduate teaching in the area of forest ecology and tree ecophysiology.
Research Associate, Botany, University of Wisconsin-Madison, January 2000-March 2003
Responsibilities: Lead research and project management of an NSF supported grant in the area of plant ecophysiology.

Awards and Distinctions

2012 Resident Fellow, University of Minnesota Institute on the Environment
2010 Newman Art of Teaching Award

- 2010 College of Food, Agricultural and Natural Resources Sciences Distinguished Teaching Award (non-tenured faculty)
- 2001 Selected to participate in an elite seminar in Advanced Comparative Tropical Ecology sponsored by Organization for Tropical Studies, Smithsonian Tropical Research Institute and the Mellon Foundation
- 1996 Outstanding Scholar Award, University of Connecticut Graduate School
- 1994 elected Phi Beta Kappa
- 1993 Raymond Selle Award for Excellence in the Occidental Biology Department
- 1993 elected to Mortarboard Honor Society

Grant and Fellowship Awards

Grants since 2002

- Protection of biodiversity and ecosystems services through early detection of tree disease using hyperspectral remote sensing co-Pis J. Cavender-Bares, J. Juzwik and R.A. Montgomery. Grand Challenges Research Grant. Office of the Executive Vice President and Provost, University of Minnesota. \$60,000.
- Backyard Phenology: Integrating Citizen Science and Public Art to Build Collective Agency on Climate Change. Co-Pis C. Baeumler, M. Davenport, N. Jordan, R. Montgomery. Grand Challenges Research Grant. Office of the Executive Vice President and Provost, University of Minnesota. \$250,000.
- Backyard Phenology: Tracking Nature’s Cycles and Seasons in a Changing Climate. NorthernLights.mn (private arts organization) \$10,000.
- Using plant phenology as an indicator of forest community resilience and adaptive capacity. PI: Dean Fellman. Co-PI R.A. Montgomery. USDA-NIFA Tribal Colleges Research Grants Program. \$200,000. \$60,000 to UMN.

Prescribed burning to improve management for brushland-dependent species. PI: R.A. Montgomery. co-PIs L. Frelich, C. Roy, L. Shartell. Legislative Citizen Commission on Minnesota Resources. \$267,000.

Controlling Reed Canary Grass to Regenerate Floodplain Forest. PI: Tim Schlagenhaft. Co-PIs R.A. Montgomery, M.T. Thomsen. \$218,000

Assessing species vulnerability to climate change using phenology. PI: RA Montgomery. Legislative Citizen Commission on Minnesota Resources. \$175,000.

Collaborative Research: Dimensions: Linking remotely sensed optical diversity to genetic, phylogenetic and functional diversity to predict ecosystem processes. NSF Dimensions of Biodiversity. PI: J. Cavender-Bares, Co-PIs R. Montgomery, S. Hobbie, \$855,314. (5/1/2014-4/30/2019)

LTER: Biodiversity, Multiple Drivers of Environmental Change and Ecosystem Functioning at the Prairie Forest Border Tilman (PI), D., P. Reich, S. Hobbie, E. Seabloom, E. Borer, J. Cavender-Bares, L. Kinkel, J. Knops, R. Montgomery, B. Sterner. NSF LTER Program. \$5,879,701; Duration: January 2013 – December 2018.

Mining the herbarium record for change in Minnesota forest phenology and distribution. GD Weiblen (PI), RA Montgomery. Minnesota Agricultural Experiment Station, \$60,000. (October 1, 2013-September 30, 2015).

Digital technologies to improve experiential learning in the Forest and Natural Resource Management Undergraduate Program. R.A. Montgomery (PI) University of Minnesota, Provost's Office, \$69,783 July, 1 2013-June 30, 2015

High impact experiential learning in the Forest Resources major. RA Montgomery and M Davenport (PIs). College of Food, Agricultural and Natural Resource Sciences. \$59,663 Duration: September 2012-September 2014.

A Citizen Phenology Network to Inform Management of Urban Water Quality. Resident Fellow Grant. RA Montgomery, SE Hobbie, J Finlay (PIs) University of Minnesota Institute on the Environment, \$10,000. March 2013-April 2014.

Minnesota Phenology Network: developing a citizen observer network for Minnesota. RA Montgomery. University of Minnesota Institute on the Environment, \$10,000. July 2012-ongoing.

Training volunteer observers in web-based reporting of the timing of biological events as key indicators of climate variability. S. Carlson (PI), RA Montgomery, E. Sagor. USDA-RREA, \$40,000. July 2012-June 2014

Agroforestry Systems for Biomass Production and Ecosystem Services. D. Zamora (PI) RA Montgomery, A D'Amato USDA-RREA. \$45,000. July 2012 - June 2014.

Collaborative Research: The complexity of global change - Interactive effects of warming, water availability, CO₂ and N on grassland ecosystem function. Reich P. (PI), R. Montgomery, R. Rich, S. Hobbie, T. Lee (co-PIs) NSF DEB-1120064 \$854,283 Duration: September 2011-August 2014

Renewal: Warming-induced biome change at the temperate-boreal ecotone: An experimental test of key regeneration processes. DOE Program on Ecological Research Grant No. N/A. \$2,528,252 (.5 mo) (Aug. 2011 – July 2015).

Institute on the Environment. Phenology: the Pulse of the Planet. \$2,500. R.A. Montgomery (PI) March 15, 2011-March 15, 2012.

US Department of Energy Program on Ecological Research. Advanced measurements of temperature elevation treatments. Supplement to 'Warming-induced biome change at the

- temperate-boreal ecotone: An experimental test of key regeneration processes.' \$279,737. P.B. Reich (PI), S. Hobbie, R.A. Montgomery, R.L. Rich and J. Oleksyn. January 1, 2010 – July, 31, 2011.
- US Department of the Interior, National Park Service. Evaluation and ecological assessment of riparian forest at Knife River Indian Villages NHS. \$42,510. R.A. Montgomery (PI). July 1, 2009 – September 30, 2012.
- US Department of Energy, National Institute on Climate Change Research. Experimental warming effects on soil organic matter dynamics at the temperate-boreal forest ecotone. \$117,500. S. Hobbie (PI), R.A. Montgomery, and P.B. Reich. April, 1 2009 – March 31, 2010.
- College of Biological Sciences. Ecology, evolution and ecosystem implications of plant traits: a collaborative framework for improving graduate student recruitment and training. \$20,000. J.S. Powers (PI), J. Cavender-Bares, S. Hobbie, R.A. Montgomery P.B. Reich, I. Schmitt, P. Tiffin and G.D. Weiblen. January 2009 – August 2010.
- Minnesota Department of Natural Resources. Evaluation of phenotypic and physiologic characteristics of genetically improved white cedar. \$20,000. R.A. Montgomery (PI) and C. Pike. July 1, 2008 – June 30, 2010.
- Minnesota Forest Resources Council. Impacts of woody biomass harvesting on saproxylic communities, nutrient availability, and productivity in aspen ecosystems. \$294,000. A.W. D'Amato (PI), C. Blinn, J. Bradford, S. Fraver, R. Kolka, K. Kozak, R.A. Montgomery, M. Ostry, B.J. Palik, and D. Zamora. July 1, 2008 – June 30, 2011.
- US Department of Energy Program on Ecological Research. Warming-induced biome change at the temperate-boreal ecotone: An experimental test of key regeneration processes. \$1,806,655. P.B. Reich (PI), S. Hobbie, R.A. Montgomery, R.L. Rich and J. Oleksyn. August 1, 2007 – July, 31, 2011.
- University of Minnesota, College of Food, Agricultural and Natural Resources Sciences. An integrated initiative on climate change in northern forests. \$200,000. P.B. Reich (PI), S. Hobbie, R.A. Montgomery, R.L. Rich and J. Oleksyn. July 1, 2007 – June, 30, 2009
- National Science Foundation Division of Integrative Organismal Biology. Synergistic effects of light and water on physiological diversification in the Hawaiian lobeliads. \$230,000. R.A. Montgomery (PI), L. Sack & T.J. Givnish. July 1, 2006 – June 30, 2010.
- US Department of Agriculture National Resources Initiative, Managing complex structure and wood productivity in Great Lakes pine ecosystems. \$400,000; UMN subcontract \$179,525. B.J. Palik (PI), R.A. Montgomery and P.B. Reich. September 1, 2006-August 31, 2010.
- US National Science Foundation Long Term Ecological Research. Biodiversity, environmental change and ecosystem function at the prairie-forest border. \$4,920,000; \$30,000 per year to RA Montgomery) G. David Tilman (PI) P.B. Reich, S. Hobbie, J. Cavender-Bares, J. King, L. Kinkel, J. Knops, R.A. Montgomery, H. Muller-Landau, S. Polasky and J.S. Powers. January 1, 2006 – December 31, 2012.
- University of Minnesota Grant-in-aid of Research, Scholarship and Artistry. Tree physiological response to climate across a latitudinal gradient. \$34,438. RA Montgomery (PI). January 1, 2005 – June 30, 2006.
- Andrew Mellon Foundation, Leaf phenology and hydraulic conductivity as determinants of shade tolerance in S. Appalachian trees. \$370,000. Tom Givnish (PI) and R.A. Montgomery January 2001 – June 2005

Smithsonian Tropical Research Institute/Organization for Tropical Studies Comparative Ecology Grant. The joint influences of climate, litter quality, and soil fauna in regulating the decomposition of leaf and root litter: a pan-tropical study. \$6000. JS Powers and RA Montgomery January 2002 – December 2003

Grants and fellowships prior to 2002

- 2001 Davis Fund, Department of Botany, University of Wisconsin-Madison (\$1000)
1999 Ronald Bamford Endowment, Department of Ecology and Evolutionary Biology, University of Connecticut (\$800)
1998-1999 NSF Biodiversity Graduate Research Traineeship (Tuition waiver and stipend)
1998 Organization for Tropical Studies Fellowship (\$3,000)
1997-1998 NSF Dissertation Improvement Grant (\$10,000)
1997 Ronald Bamford Endowment, Department of Ecology and Evolutionary Ecology, University of Connecticut (\$500)
1996-1997 NSF Biodiversity Graduate Research Traineeship (Tuition waiver and stipend)
1993 Ford Foundation/Hughes Fellowship (\$3,000, declined)
1993 Council for Undergraduate Research Fellowship (\$3,000)
1992 Richter Fellowship (\$4,000)

Presentations

Invited Seminars, Symposia and Workshops

- 2016 Some like it hot, some like it cold: tree response to warming at the temperate-boreal forest ecotone. Department of Forestry and Natural Resources, Purdue University, West Lafayette, IN.
Nature's calendar: climate change and changing seasons. Department of Geography, University of Minnesota, Minneapolis, MN.
Nature's calendar: How climate change is altering plant and animal phenology. Friends of the St. Croix Watershed Research Station, Marine-on-St. Croix, MN.
Nature's calendar: How climate change is altering plant and animal phenology. Minnesota Pollution Control Agency Lake Monitoring Volunteer Appreciation Luncheon, Brainerd, MN.
- 2015 Driven to Discover Phase II: Citizen Science Education for Teachers. Led weeklong workshops on phenology.
Signs of the seasons: how climate change is altering plant and animal phenology. Conservation Biology Program, University of Minnesota, St. Paul, MN.
- 2014 What to plant? Forest health for the future (panelist). Sustainable Forests Education Cooperative. University of Minnesota, Cloquet, MN
B4WarmED: a climate change experiment at the temperate-boreal ecotone. Hawkesbury Institute for the Environment, Richmond, NSW, Australia.

Pushing the limits: experimental warming at the temperate-boreal ecotone in North America. Australian National University, Canberra, ACT, Australia.

Strategies for addressing climate change impacts on Minnesota forests. Second conference on climate change: building Minnesota's capacity for climate adaptation. Minneapolis, MN. (co-presented by P.B. Reich)

What to plant? Forest health for the future. Panel discussion for Sustainable Forests Education Cooperative. University of Minnesota, Cloquet, MN (panel discussion with Pike, C.C., Klevorn, R.).

- 2013 Range limits and climate change: experimental warming at the temperate-boreal forest ecotone in North America. Universidad de los Andes, Departamento de Ciencias Biológicas, Bogota, Colombia
- 2012 Effects of experimental warming on tree regeneration at the temperate-boreal ecotone; University of St. Katherine, Department of Biology, St. Paul, MN
Signs of the seasons: the timing of biological activity under climate change. Summer Institute for Climate Change Education, Will Steger Foundation, Apple Valley, MN
Plant phenological responses to experimental warming at the temperate-boreal ecotone. Botanical Society of America Annual Meeting, Columbus, OH
Citizen Science for Educators, University of Minnesota, short course for K-12 teachers, I gave a talk and led a small group in a phenology research project
Phenology: tracking Minnesota's ever changing forests, My Minnesota Woods, webinar
- 2011 How many and where: An ecologist's perspective on planting trees in the city, Minnesota Shade Tree Short Course, St. Paul, MN
Effects of experimental warming on tree regeneration at the temperate-boreal ecotone; Carleton College, Department of Biology, Northfield, MN
Phenology & climate change: How timing of biological activity affects forests now and in the future, Sustainable Forests Education Cooperative, Webinar
Variable retention harvesting in Great Lakes red pine forests: effects on resource availability, sapling growth and plant-plant interactions; University of Wisconsin, Department of Forest and Wildlife Ecology, Madison, WI
Effects of experimental warming on tree regeneration at the temperate-boreal ecotone; Rocky Mountain Biological Lab, Gothic, CO
- 2010 Competitive interactions in heterogeneous forests: a large scale manipulation of a red pine ecosystem, University of Minnesota; Dept. of Ecology, Evolution and Behavior; St. Paul, MN
Whole forest leaf biomass and leaf area in old- and second-growth tropical lowland Papua New Guinea. *In* Symposium entitled "Understanding the dynamics of tropical secondary forests." Association for Tropical Biology and Conservation, Bali, Indonesia.

- Putting the "adaptive" into "adaptive radiation": diversification of ecophysiology in the Hawaiian Campanulaceae. University of St. Thomas, Dept. of Biology, St. Paul, MN
- Phenology matters: linking citizen science and the academy to understand our changing planet. Northwoods Phenologist's Meeting, Wolf Ridge Environmental Learning Center
- Mechanisms of competition between shrubs and tree seedlings in managed red pine. Sustainable Forests Education Cooperative. Annual Research symposium, Cloquet, MN
- 2009 B4WARMED: Boreal Forest Warming at an Ecotone in Danger. MN Native Plant Society Monthly Meeting, St. Paul, MN
- Is it roots or is it shoots? Insights into mechanisms of plant-plant interactions in red pine ecosystems. University of Toronto, Department of Forestry.
- Roots or shoots? mechanisms of plant-plant interactions in red pine ecosystems. Harvard Forest Seminar Series, Petersham, MA.
- 2008 Adaptive radiation of photosynthetic physiology in the Hawaiian Campanulaceae, University of Wisconsin, Dept. of Botany, Madison, WI
- Trees, shrubs, sedges and hog peanuts: towards a mechanistic understanding of species interactions above- and belowground, University of Wisconsin, Dept. of Biology, Eau Claire, WI
- 2007 Ecophysiological diversification in the Hawaiian Campanulaceae: evidence for adaptive radiation in Hawaii's largest flowering plant family, University of Minnesota, Dept. of Plant Biology, St. Paul, MN
- Dynamic photosynthetic responses and light gradient partitioning. Symposium on the Functional Ecology of Tropical Trees. Association for Tropical Biology and Conservation, Morelia, Mexico
- Adaptive radiation of photosynthetic physiology in the Hawaiian Campanulaceae. US-Japan Workshop on Photosynthetic Plasticity and Global Change, Nikko, Japan
- 2006 Overstory and understory effects on tree regeneration: towards a mechanistic understanding of species interactions above- and belowground Michigan State University, Dept. of Forestry, East Lansing, MI
- Red pine retention project research field tour for Chippewa National Forest staff and Northern Research Station staff. Tamarack Point, Chippewa National Forest, MN.
- 2005 Adaptive radiation of photosynthetic physiology in the Hawaiian lobeliads (Campanulaceae), University of Minnesota, Dept. of Ecology, Evolution and Behavior, St. Paul, MN
- Adaptive radiation of photosynthetic physiology of the Hawaiian lobeliads, Grinnell College, Dept of Biology, Grinnell IA.
- 2004 Adaptive radiation of photosynthesis and life history traits in the Hawaiian lobeliads. Association for Tropical Biology and Conservation, Miami, FL

Teaching & Learning

Courses Designed and Taught

University of Minnesota curriculum designators:

Forest Resources (FR)

Environmental Sciences, Policy and Management (ESPM)

Ecology, Evolution and Behavior (EEB)

Grand Challenge Curriculum (GCC)

GCC3013/5013: Making Sense of Climate Change: Science, Art and Agency (3 credits) In this course we will consider how communities can bring science and art together to face the challenges of climate change. We explore climate-change science, examine the idea of collective agency (communities working together to make change), and consider public art as a tool for building collective agency. We focus on how artistic/humanistic ways of knowing can enable groups to make sense and meaning in the face of grand challenges. By putting global grand challenges such as climate change into a place-based and agency-focused perspective participants expand their understanding of how humanity might address grand challenges. We bring these ideas together to create a public art piece for the Northern Spark Art Festival, an all night festival in the Twin Cities metro area. Students I have taught this course since Spring 2016. Enrollment = 10-20 undergraduates and 5-10 graduate students.

FR3104/5104: Forest Ecology (4 credits) This course provides an introduction to ecology through the lens of forest ecosystems. The course explores interactions between the individual tree and the environment, evolution, biotic interactions, forest biogeochemistry, succession and disturbance. It includes a weekly 4 h field lab. The course is a required course for FR majors and serves students in ESPM and FWCB programs. Graduate students are not required to participate in lab but are required to attend a 1 h per week journal club where we read current literature in ecology. I have taught this course every year since Fall 2004. Enrollment = 35-60 undergraduates and 5-10 graduate students.

FR2102: Northern Forests Field Ecology (2 credits) This is a field course based at the Cloquet Forestry Center that provides students with hands-on experience in forest soils, succession, forest dynamics, competition, community ecology, field sampling methods and scientific writing. It runs for three weeks in August and provides opportunity for close contact between faculty and students. It is a required course for FR majors and satisfies the 'experience and training in a field setting' requirement of for ESPM majors. I have taught this course every summer since 2004. Enrollment = 20-30 undergraduates

August Introductory Field Session in Natural Resources – FR & FWCB I coordinate the field session at the Cloquet Forestry Center organizing housing and food services, check-in and check out and orientation. I coordinate our activities with CFC staff throughout the session and generally take care of logistics associated with the four courses, ~80 students and 10+ teaching staff in residence at the station.

ESPM 3108/5108: Ecology of Managed Ecosystems (3 credits) This is a team taught course that uses a case study approach to explore ecological patterns and processes in managed ecosystems (e.g. agricultural, urban, forest, wetland). It serves ESPM majors as a foundational course in ecological principles. I taught this course for the first time in Fall 2009. Enrollment = 50-60 undergraduates and 5-10 graduate students.

FR 4118/5118: Ecophysiology of Woody Plants (3 credits) This course introduces students to plant functional ecology, exploring photosynthesis, water relations, nutrient uptake, anatomy and growth. The student audience is largely urban forestry majors so I focus largely on urban ecosystems. I taught this course in Spring 2003 and Spring 2004. Enrollment = 5-15 undergraduate students

Other Teaching Experience

Plant Functional Traits in Ecology and Evolution team taught by faculty in the Departments of Forest Resources and Ecology, Evolution and Behavior (2007, 2008)

Fundamentals of Tropical Biology, Organization for Tropical Studies, Resource Faculty (2008, 2007, 1998, 1993)

Undergraduate Semester Abroad Program, Organization for Tropical Studies, Resource Faculty (2003)

Current Topics in Ecology and Evolutionary Biology, 1 credit seminar, University of Connecticut (1999)

The Border: Environment, Economy, and Culture, Occidental College, Teaching Staff (1993-1994)

Marine Ecology, Vantuna Research Group, Instructor on board the Research Vessel Vantuna (1990-1994)

Mentoring & Advising

Post-doctoral scholars

Suzanne Boyden (2005-2008) Managing complex structure and wood productivity in Great Lakes pine ecosystems – Dr. Boyden is currently Assistant Professor of Forest Ecology at Clarion University.

Justin Kunkle (2008-2010) Synergistic effects of light and water on physiological diversification in the Hawaiian lobeliads – Dr. Kunkle is currently LTER Science Coordinator for the W.K. Kellogg Biological Station.

Graduate program appointments

Natural Resources Sciences and Management (NRSM)
Plant Biological Science (PBS)
Ecology, Evolution and Behavior (EEB)
Conservation Biology (CB)

Graduate student advising

Completed graduate student advisees:

Mara McPartland (M.S. 2017, NRSM) Response of boreal peatland to global change: a remote sensing approach – Ph. D. student, Department of Geography, University of Minnesota, USA

Karen Rice (M.S. 2016, NRSM) Phenological responses of herbaceous plants, shrubs, and tree seedlings to experimental climate change conditions in northern Minnesota; current position – scientist at USGS Invasive Research Center, Fort Lauderdale, FL, USA.

Andrew Pretorius (M.S. 2015, NRSM) Role of leafing phenology in the invasion of forest ecosystems by *Rhamnus cathartica* – high school science teacher, Hanover, Ohio

Kala Peebles (Ph. D. 2014, NRSM) The effects of climate warming on tree seedling physiology, growth and survival in a temperate-boreal forest ecotone in Minnesota, USA.

Moana McClellan (Ph. D. 2014, PBS) Assessing Forest Structure, Biodiversity, and Ecosystem Functions between Public and Private Tropical Dry Secondary Forests, a case study in Guanacaste, Costa Rica; current position – staff member, Institute of Environment and Sustainability, University of California Los Angeles

Carrie Pike (Ph. D. 2013, NRSM) Evaluation of phenotypic and physiologic characteristics of selected sources of white spruce, *Picea glauca* (Moench); current position – **coordinator, Minnesota Tree Improvement Cooperative**

Ted Salk (co-advise w/L. Frelich; M. S. 2013, NRSM) Poor Recruitment is Changing the Structure and Species Composition of an Old-Growth Hemlock–Hardwood Forest

Claudia Nanninga (M.S. 2013, NRSM) An assessment of bottomland hardwood forests at the Knife River Indian Villages National Historic Park; current position – Ph. D. student, Department of Forest Resources, University of Minnesota

Chris Pinahs (co-advise w/P. Reich; M.S./J.D. 2011, PBS/UMN Law School) Experimental Warming: How Temperature Affects Germination and Survival of Minnesota Tree Species; current position – lawyer, Robins Kaplan LLP

Christel Kern (co-advise w/P. Reich; Ph. D. 2011, NRSM) The Role of Harvest Gaps in the Plant Diversity of a Northern Hardwood Forest of Northern Wisconsin, USA; current position – Research forester, USDA Forest Service Northern Research Station

Cassie Kurtz (M.S. 2010, NRSM) – Effects of site and climate characteristics on forest invasibility by non-native plants in the Midwest; current position – analyst, USDA Forest Service Forest Inventory and Analysis program

Stacey Olszewski (M.S. 2009, NRSM; co-advised with Eric Zenner) Structural and compositional changes in the terrestrial vegetation of forested riparian areas as a result of a gradient of timber harvesting regimes; current position – plant ecologist/botanist, NatureServe

Brian Pelc (M.S. 2008, NRSM; co-advised with Peter Reich) American hazel (*Corylus americana*) resprout dynamics and influence on understory community in Midwestern oak savanna; current position – natural areas restoration specialist, The Nature Conservancy, Florida

<u>Current graduate student advisees:</u>	<u>Degree</u>	<u>Program</u>
Maria DeLandreau	M.S.	NRSM
Kaitlyn Flick	Ph.D.	NRSM (co-advise w/Mike Dockry)
Anna Hawkinson	M.S.	NRSM
Matt Hill	M.S.	NRSM
Thomas Kenote	M.S.	NRSM
Lori Knosalla	M.S.	NRSM
Jamie Mosel	Ph. D.	NRSM (co-advise w/Matt Russell)
Claudia Nanninga	Ph.D.	NRSM
Artur Stefanski	Ph.D.	NRSM (co-advise w/Peter Reich)

Other graduate student advising (committee membership):

Kris Moore (2016-present)* TBD

Liam Gilson (2017-present) Global change impacts on grassland phenology

Theodore Brauer (2017) Seedbanks in northern peatlands under experimental warming

Samantha Rademacher (2016) Understory vegetation response to experimental warming and elevated CO₂ in peatlands

Talia Anderson (2016)* - committee member

Sophia Gutterman (2016)* - committee member

Erik Schilling (2013) Forest compositional response to oak wilt in central Minnesota

Laura Nelson (2013)*

Abigail Hanson (2013)*

Lindsay Hastings (2012) Climate drivers of long-term trends in tree phenology in north central Minnesota

Gael Zembal (2011)* The role of temperature and photoperiod as cues for budbreak of six temperate deciduous tree species

Emma Schultz (2008)* Understory plant community response to silvicultural opening size across and between gaps in Wisconsin northern hardwood forests co-advised with Christel Kern

Brandon Gallagher (2005) Distribution and habitat characterization for three species of *Goodyera* (Orchidaceae) within the Rainy Lake, Ontario watershed

Kathryn Smith (2005-2006)* Effects of shrub competition on photosynthetic physiology of six temperate tree species

Melissa Maxa (2005) Root competition for nitrogen and phosphorus between *Pinus resinosa* seedlings and northern Minnesota forest plants

Service

College and University Committee Service

2017	Department of Forest Resources head search committee, CFANS
2016-2017	Itasca Biological Station Director search committee, College of Biological Sciences
2015-2016	Gullion Chair faculty search committee; Department of Fisheries, Wildlife and Conservation Biology
2016	Itasca Biological Station External Review
2016-present	University Learning and Technology Advisors (ULTA) Committee
2015-present	CFANS e-Learning Advisory Committee
2015-present	Cedar Creek Ecosystem Science Reserve Advisory Board
2015-present	Cedar Creek Ecosystem Science Reserve Land Use Committee
2011- present	Undergraduate Policy Review Committee
2009-present	College of Food, Agricultural and Natural Resource Sciences Safety committee
2012-2013	St. Paul Campus Research Lab Assessment committee
2012	CFANS Research Lab Assessment committee
2011-2013	University Senate
2011-2013	CFANS Curriculum Committee
2011-2012	Global Spotlight Committee
2008	St. Paul Open Spaces for Learning Taskforce
2006-2009	College of Food, Agricultural and Natural Resources Sciences, Honors Committee
2006-2010	College of Food, Agricultural and Natural Resource Sciences Student board (faculty advisor)
2006-2007	Atmospheric chemist faculty search committee, Department of Soil, Water and Climate
2006-2007	Silviculture faculty search committee, Department of Forest Resources
2006	Plant nutrient management faculty search committee, Department of Soil, Water and Climate
2005-2006	Graduate Working Group for merger of CNR/COAFES
2005-2006	ENR/ES Major Curriculum development
2004-2006	College of Natural Resources Student Faculty board

Departmental Committee Service

2016-present	FNRM Curriculum, advising and recruiting committee, chair
2016-present	FR Tribal Diversity and Inclusion committee

2011-present Forest and Natural Resource Management major coordinator
2010 Forest Resources undergraduate curriculum revision committee
2006-2007 Promotion & Tenure Requirements revision committee
2008 Strategic Planning ad hoc committee

Professional Service

2015-present Associate editor, Plant Ecology
2011-2013 MN Science Team for Northwoods Climate Change Response
Framework
2011-2014 Associate editor, Forest Science

Reviewer for American Journal of Botany, Biotropica, Canadian Journal of Forest Research, Ecology, Forest Science, Functional Ecology, Functional Plant Biology, Journal of Biometeorology, Journal of Ecology, Journal of Forestry, Journal of Geophysical Research-Atmosphere, Journal of Vegetation Science, Journal of Tropical Ecology, New Phytologist, Oecologia, Plant Ecology, Proceedings of the Irish Royal Society, Restoration Ecology, Teaching Issues and Experiments in Ecology, Tree Physiology

Grant reviewer for Graduate Women in Science, INDICASAT Panama, Minnesota Agricultural Experiment Station, Natural Sciences and Engineering Research Council of Canada, USDA National Research Initiative, US National Science Foundation

Society Membership and Service

Member of the Ecological Society of America, the Association for Tropical Biology and Conservation, and the Society of American Foresters.

2009-present Chair of the C6 Physiology section of the Society of American Foresters

2005, 2010 Billings/New Phytologist Award judge, Best Graduate Student Paper/Poster, Ecophysiological section of the Ecological Society of America

Public Service

2009-present Falcon Heights Environment Commission
2011-2015 Minnesota Department of Natural Resources Commissioner's Advisory Committee

Specialized Training

CFANS Leads: Leadership development program for mid-career faculty (2016)
Next Generation of the Professoriate: Using Technology in Teaching and Learning, UMN Center for Teaching and Learning (2006)

Bush Faculty Early Career Teaching Program, UMN Center for Teaching and Learning
(2004-2005)

Grant writing seminar: Getting started as a successful grant writer and academician
(2004)

Languages

Spanish – conversational to fluent
